

Company Overview & Corporate Profile

Everything an agent should know about who BharatConnect is

Document ID: KB-CORP-001 **Version:** 3.2 **Effective:** 01 June 2026 **Owner:** Corporate Communications
Classification: Internal — RAG Knowledge Base **Review cycle:** Quarterly

1. About BharatConnect

BharatConnect Telecommunications Limited ("BharatConnect") is a pan-India mobile network operator and digital services provider headquartered in Pune, Maharashtra. Founded in 2009, the company provides prepaid and postpaid mobile connectivity, high-speed mobile data, fixed-line fibre broadband (BharatConnect Fiber), and bundled OTT entertainment to consumers and businesses across the country. As of the most recent reporting period, BharatConnect serves approximately **82 million active subscribers**, making it one of India's larger telecom operators by subscriber base.

BharatConnect's strongest presence is in Maharashtra, Tamil Nadu, Karnataka, and the Hindi-belt states (Uttar Pradesh, Madhya Pradesh, Bihar, Rajasthan). A defining characteristic of the customer base is that a large majority live in Tier-2 and Tier-3 cities and rural areas, and prefer to interact in their regional language — most commonly Marathi, Tamil, and Hindi — rather than English.

Why this matters for support agents

Most customers are more comfortable in their regional language. Always continue the conversation in the language the customer started in; never switch them to English.
Assume the customer may not know plan codes or technical terms — explain in plain language.

2. Mission, Vision & Values

Mission: To connect every Indian — in every town and every language — with reliable, affordable, and effortless communication.

Vision: To be India's most trusted telecom brand by serving each customer a little better than the day before.

Core values:

- **Customer-first:** A live customer always takes priority over any background task.
- **Clarity:** No hidden charges, no jargon. Every bill line can be explained.
- **Inclusion:** Service in the customer's own language is a right, not a feature.
- **Trust:** We protect customer data and never push purchases the customer didn't ask for.

3. Company at a Glance

Attribute	Detail

Support languages	Hindi, Marathi, Tamil, Telugu, Kannada, Bengali, English
Monthly support volume	~2 million calls / month
Website	www.bharatconnect.in (sole channel for recharges & add-ons)

4. Services Portfolio

4.1 Mobile — Prepaid

Pay-before-you-use mobile plans aimed at the mass market. Customers buy a recharge that bundles validity, voice, SMS, and daily/total data. Prepaid is the most popular product and accounts for the majority of support calls (recharge confirmation, plan choice, validity questions). See KB-BILL-003 for the full plan catalogue.

4.2 Mobile — Postpaid

Monthly billing plans for higher-usage customers, with a fixed monthly rental, a bill generated at the end of each cycle, and optional family/add-on lines. Postpaid customers have a billing cycle, a credit limit, and a due date — these drive a distinct category of support questions (bill explanation, due date, late fees).

4.3 Mobile Data & Add-Ons

Customers can top up data beyond their base plan using data add-on packs (e.g. extra 1 GB, 5 GB, or unlimited-night packs). Add-ons are purchased **only via the website** (see Section 6 and KB-BILL-003).

4.4 BharatConnect Fiber (Home Broadband)

Fibre-to-the-home broadband with plans from 100 Mbps to 1 Gbps, often bundled with a Wi-Fi router and OTT subscriptions. Available in select metros and Tier-1/Tier-2 cities.

4.5 OTT & Entertainment Bundles

Select prepaid, postpaid, and fiber plans bundle OTT streaming subscriptions. These bundles are a frequent source of billing confusion — customers sometimes don't realise an OTT add-on auto-renews. Agents should be ready to explain and, where eligible, guide the customer to remove it via the website.

5. Corporate & Regulatory

- **Regulator:** BharatConnect operates under licences from the Department of Telecommunications (DoT) and is regulated by the Telecom Regulatory Authority of India (TRAI).
- **KYC:** All connections require KYC verification per DoT norms (see KB-POL-002).
- **Grievance redressal:** A formal complaint and appellate process exists, as mandated by TRAI (see KB-POL-002).
- **DND:** BharatConnect honours the national Do-Not-Disturb registry for marketing calls/SMS.

6. The One Rule Every Agent Must Know

Recharges and add-ons are sold **ONLY** on the website

BharatConnect does **not** process recharges, plan purchases, or data add-on payments over the phone, over voice, or through the support agent.

The **only** way for a customer to purchase a recharge, change a plan, or buy a data add-on is through the official website: **www.bharatconnect.in** (or the linked app login).

An agent's job is to **help the customer decide** what they need and then **direct them to the website** to complete the purchase — never to take payment details over voice.

This rule exists for security (no card details over voice) and is non-negotiable.

7. Brand Voice for Support

When representing BharatConnect, agents (human or AI) should be warm, patient, and respectful. Speak in the customer's language, avoid jargon, confirm understanding, and never make the customer feel rushed. If an issue cannot be resolved, set a clear expectation and a realistic timeline rather than a vague reassurance.
