

Billing, Recharges, Plans & Add-Ons

The complete catalogue and billing rules — the agent's most-used reference

Document ID: KB-BILL-003 **Version:** 5.0 **Effective:** 01 June 2026 **Owner:** Revenue & Products

Classification: Internal — RAG Knowledge Base **Review cycle:** Quarterly

READ FIRST — How purchases work at BharatConnect

Recharges, plan changes, and data add-ons are purchased **exclusively on the website**:

www.bharatconnect.in (log in with mobile number + OTP, or via the linked app).

Agents do **NOT** take payments, card details, or UPI over voice and cannot apply a recharge themselves.

The agent's role: help the customer pick the right plan/add-on, then direct them to the website to complete it. Always end such calls with the website step clearly stated.

1. Prepaid Plans

Prepaid is pay-before-use. A recharge bundles validity (days), daily or total data, voice, and SMS. All prices are indicative and inclusive of taxes. Current catalogue:

1.1 Popular Daily-Data Packs

Plan code	Price	Validity	Data	Voice / SMS	Notes
PP-179	Rs.179	28 days	1 GB/day	Unlimited / 100 SMS/day	Entry daily pack
PP-299	Rs.299	28 days	1.5 GB/day	Unlimited / 100 SMS/day	Most popular
PP-399	Rs.399	56 days	2 GB/day	Unlimited / 100 SMS/day	Better value
PP-666	Rs.666	84 days	1.5 GB/day	Unlimited / 100 SMS/day	Quarterly
PP-2999	Rs.2999	365 days	2 GB/day	Unlimited / 100 SMS/day	Annual, best value

1.2 Data-Only & Special Packs

Plan code	Price	Validity	Benefit
PP-D19	Rs.19	1 day	1 GB data only (no voice/SMS change)
PP-D49	Rs.49	3 days	3 GB data only
PP-D199	Rs.199	30 days	12 GB total data, no daily limit
PP-OTT-499	Rs.499	28 days	2 GB/day + 1 OTT subscription bundled

Validity-only recharges (no data, just keep number active) start at Rs.49.

2. Postpaid Plans

Postpaid is monthly billing: a fixed rental, a billing cycle, and a bill at the end of the cycle. Each plan has a credit limit.

Plan code	Monthly rental	Data	Voice / SMS	Bundled OTT
POST-399	Rs.399	40 GB	Unlimited / 100 SMS/day	None
POST-599	Rs.599	75 GB	Unlimited / 100 SMS/day	1 OTT
POST-799	Rs.799	Unlimited (FUP)	Unlimited / 100 SMS/day	2 OTT
POST-FAM-999	Rs.999	Unlimited (FUP) + 1 extra SIM	Unlimited / 100 SMS/day	3 OTT

Unused postpaid data does not carry over. Extra usage beyond an explicit cap is charged per the plan's data rate or requires a data add-on.

3. Data Add-On Packs

Add-ons top up data on top of an existing plan (prepaid or postpaid) without changing the base plan or its validity. **Purchased on the website only.**

Add-on code	Price	Data	Validity	Works with
ADD-1G	Rs.22	1 GB	Same as base plan	Prepaid & Postpaid
ADD-5G	Rs.65	5 GB	Same as base plan	Prepaid & Postpaid
ADD-NIGHT	Rs.19	Unlimited 12am–6am	7 days	Prepaid
ADD-WKND	Rs.39	10 GB weekend	Weekend only	Prepaid & Postpaid
ADD-ROAM-INTL	Rs.999	5 GB + intl voice	10 days	Both (intl roaming)

4. Billing Cycle & Due Dates (Postpaid)

- Each postpaid account has a fixed **billing cycle** (e.g. 1st–30th). The bill is generated 2–3 days after cycle close.
- The **due date** is typically 15 days after bill generation.
- Bills, itemised usage, and payment are all available on the website.
- Late payment:** a late fee applies after the due date; continued non-payment leads to outgoing bar, then full bar (see KB-POL-002 §8).

5. How a Customer Pays / Recharges (Agent Script)

Because purchases are website-only, the agent guides the customer through where to go — not through taking a payment:

- Step 1 — Go to **www.bharatconnect.in** (or open the app).
- Step 2 — Log in with the mobile number; enter the OTP sent by SMS.
- Step 3 — Choose **Recharge** (prepaid), **Pay Bill** (postpaid), or **Add-Ons**.
- Step 4 — Select the plan/add-on (the agent can tell them the exact plan code, e.g. PP-299).
- Step 5 — Pay via UPI, card, net-banking, or wallet on the website's secure checkout.
- Step 6 — Recharge/add-on applies instantly; a confirmation SMS is sent.

Never do this

Do not ask the customer to read out card numbers, CVV, UPI PIN, or OTP to you.

Do not promise to 'recharge it from your side' — the agent cannot.

If the customer cannot use the website, guide them to the BharatConnect app or the nearest retail store, but the transaction still happens on those channels — never over voice.

6. Common Billing Scenarios & Correct Answers

Customer says...	What's likely happening	Agent action
"My bill is Rs.100 more than my plan"	An OTT/data add-on auto-renewed, or extra-usage charge	Explain the line item; guide to website to cancel future renewal if unwanted

Customer says...	What's likely happening	Agent action
"I recharged but didn't get data"	Wrong plan chosen, or recharge still processing, or failed txn	Check plan applied; if failed, give refund timeline (3–5 days) & txn reference
"I want more data, same validity"	Customer wants a data add-on, not a new plan	Recommend ADD-1G/ADD-5G; direct to website Add-Ons section
"My data is over before month-end"	Daily quota used / FUP throttling, or heavy usage	Explain FUP (KB-POL-002 §3); suggest add-on or higher plan
"Why was I charged after I stopped using it?"	Postpaid rental is charged regardless of usage until plan changed/disconnected	Explain postpaid billing; guide to plan change/disconnection on website

7. Taxes & Fine Print

- Listed prepaid prices are inclusive of applicable taxes; postpaid rentals attract GST on top.
- Plan benefits (data/validity) begin at the moment the recharge is successfully applied.
- Promotional plans may be time-limited; the website always shows the current live catalogue, which is the authoritative source if a price here is out of date.
